Brian LeDuc, Program Director

JIN Data Exchange (JINDEX)

The Technical Advisory Group met on Tuesday to discuss the customer requirements report. We also agreed to solicit information from Microsoft and Sonic regarding their respective software products, and I sent out a questionnaire this afternoon. Additionally, representatives of both companies have agreed to come to Olympia for a Q&A session tentatively scheduled for January 18th.

Summary Offender Profile (SOP)

Templar has got the application back up and running, giving me an opportunity to confirm Bonnie Woodrow's discovery that SOP does not return all relevant data from JIS. I have discussed this with Templar and will work with AOC to determine the root of the problem. Now, at least apparently able to set up use accounts for the people at WSP who have expressed an interest in trying SOP, I was unsuccessful, receiving instead the error message below, which I have recreated in color as a metaphor for my exasperation.

Previous attempt failed for following reason: Error adding User nested exception is: Could not send mail to the user just added: nested exception is: Sending failed; nested exception is: class javax.mail.MessagingException:

National Governors Association (NGA) Grant Opportunity

I submitted the proposal for the creation of an XML version of the LESA incident report, as well as a generic template to make available to state agencies. The NGA is offering grants of up to \$50,000 for states to pursue pilot initiatives using Justice XML 3.0. Garry Austin assisted in obtaining a letter of endorsement from Governor Locke, and the Governor-elect also provided a letter, which I was able to pick up yesterday.

Electronic Citations

I met with Dirk Marler and Randy Mckown of AOC to discuss proposed use of the JIN funds available for electronic citations. Based on the Codesic report done for AOC, as well as our conversation, we are in agreement that the funds should be directed toward designing the complete architecture for the project and automating one of the key exchanges. I will prepare a draft statement of work and circulate it to the Steering Committee next week.

I also discussed AOC's draft legislation to abolish the requirement for signatures with Carrie Tellefson of DIS and have agreed to take the lead on this initiative. I prepared a briefing page on the subject and sent meeting requests to the heads and ranking minority members of the Committee that handled last year's bill.

Miscellaneous

? I made a presentation to the Committee on Homeland Security on JIN activities on Wednesday.
